

Pankaj Vishwakarma
 A wing-203 Gharkul building,
 Pimpri pada, General AKV Marg,
 Malad (East) 400097. Maharashtra.

Email: vishpkj@gmail.com

Mobile no.: +91 9702309081

Professional Summary

- 11+ years of progressive experience in Investment Banking and Capital Markets, with deep expertise in **DevOps leadership, CI/CD pipeline orchestration, cloud infrastructure management, and SRE practices**—driving automation, reliability, and operational excellence for mission-critical Java/UNIX/Oracle platforms.
- Proven track record in designing and implementing end-to-end DevOps frameworks across Prime Brokerage, Back Office, and Trade Settlement ecosystems—spanning APAC, EMEA, and NA regions—with focus on infrastructure as code, containerization, observability, and zero-downtime deployments.
- Current role as **DevOps Manager / Operations Lead**, accountable for building scalable deployment pipelines, managing hybrid-cloud environments (AWS/Azure/GCP), enforcing GitOps practices, and leading cross-functional teams to achieve SLA/SLO targets with measurable MTTR/MTTD improvements.
- Strong command of DevOps toolchains: Jenkins, Git/GitHub Actions, Ansible, Docker, Kubernetes, Terraform, Prometheus/Grafana, Splunk, Dynatrace—integrated with ITIL governance to balance agility with compliance in regulated financial environments.
- Expertise in bridging Development, Operations, and Security teams through DevSecOps practices, automated testing gates, secret management, and audit-ready infrastructure provisioning—ensuring secure, repeatable, and compliant release workflows.
- Adept at mentoring DevOps/SRE teams, establishing center-of-excellence standards, and driving cultural transformation toward automation-first, blameless post-mortems, and continuous improvement.

Skills

Summary

Domain

Investment Banking, Treasury Business & Global Markets

Tools / DB / Packages / Framework / ERP Components

- Knowledge of monitoring tools like ITRS Geneos and setting up the alert based on the criticality.
- Java, Python, Spring MVC, Spring Boot, Hibernate, Microservices, REST API, Web Services
- Oracle 11G, Oracle 19C, SQL Server, MySQL, Snowflake, Sybase
- UNIX, Linux, RHEL, RHEL Satellite Tool, Shell Scripting, Windows, Windows Scheduler
- Control-M, Autosys, Batch Jobs, Cron
- WebLogic Server, Apache Tomcat, IIS
- Jenkins, TeamCity, Git, GitHub, GitOps, Tortoise Git, Github Action
- Selenium Automation, Fortify Audit Workbench
- Geneos, ITRS Geneos, Splunk, AppDynamics, Grafana, Dynatrace
- SRE framework, DevOps, Observability, SLA, SLO, Root Cause Analysis
- AWS, EC2, RDS, EKS, Lambda, IAM, VPC, CloudWatch
- Azure, VM, AKS, SQL, VNets, Monitor, Defender
- GCP, CE, GKE, Cloud SQL, Operation Suites
- Docker, Kubernetes, OpenShift, Ansible
- Apache Kafka, ITSM ServiceNow, ITIL, JIRA

Experience:

Project: Back Office Operations

Job Profile: Operation Specialist
Date

(Manager)

Work Duration: Oct 2025 – Till

Project: Back Office Operations Platform – DevOps Transformation & SRE Enablement

Java-based platform processing trade flows from Murex to downstream Settlement and General Ledger systems

- **DevOps Strategy & Pipeline Ownership:** Designed and implemented end-to-end CI/CD pipelines using Jenkins, Git, and GitHub Actions for automated build, test, security scanning, and deployment of microservices—reducing release cycle time by 40%.
- **Infrastructure as Code & Cloud Management:** Led migration of legacy deployments to containerized environments using Docker and Kubernetes (EKS/AKS); authored Ansible playbooks and Terraform modules for reproducible, audit-compliant infrastructure provisioning.
- **Observability & SRE Practices:** Established unified observability framework integrating Geneos, Splunk, and Dynatrace for real-time metrics, distributed tracing, and log aggregation; defined SLIs/SLOs and error budgets to guide reliability investments.
- **Automation & Self-Healing Operations:** Developed Python/Shell automation for batch job validation, reconciliation checks, and auto-remediation of common failures—reducing manual toil by 35% and improving EOD processing reliability.
- **DevSecOps & Compliance Integration:** Embedded security gates (Fortify, SonarQube) and secret management into pipelines; ensured all deployments adhered to ITIL Change Management with audit-ready documentation and rollback capabilities.
- **Team Leadership & Coaching:** Mentored a team of 10 DevOps/SRE engineers on cloud-native practices, incident response, and automation; established runbooks, KEDB, and blameless post-mortem culture to accelerate learning and resilience.

Key Achievements:

- ✓ Led zero-downtime migration of critical batch services to Kubernetes, improving scalability and reducing infrastructure costs by 25%.
- ✓ Implemented GitOps workflow with ArgoCD for declarative environment management, eliminating configuration drift across PROD/UAT.
- ✓ Reduced P1 incident MTTR by 50% through proactive alert tuning, automated runbook execution, and cross-team war-room protocols.

BNP PARIBAS INDIA SOLUTION PRIVATE LTD

Work Duration: Jan 2018 – Oct 2025

Role – Technical Lead

Project: Prime Brokerage Platform – Global DevOps & Cloud Enablement

End-to-end DevOps support for Prime Brokerage systems across APAC, EMEA, and NA regions

- **CI/CD at Scale:** Orchestrated multi-region release pipelines using Jenkins, TeamCity, and Git; implemented parallel testing, artifact promotion, and automated rollback strategies to support 50+ weekly deployments with 99.95% success rate.
- **Cloud Migration & Hybrid Architecture:** Spearheaded lift-and-shift and refactor initiatives to AWS/Azure; designed VPC networking, IAM policies, and cloud monitoring to ensure secure, compliant, and cost-optimized operations.
- **Containerization & Orchestration:** Containerized legacy Java applications using Docker; deployed and managed workloads on Kubernetes (EKS/AKS/GKE) with Helm charts, resource quotas, and horizontal pod autoscaling.
- **Observability & Proactive Operations:** Configured Geneos dashboards and Splunk alerts for infrastructure, application, and business-layer monitoring; reduced alert fatigue by 60% through intelligent correlation and threshold tuning.
- **Automation & Self-Service Enablement:** Built Python/SQL/Shell scripts for environment provisioning, data validation, and post-deployment health checks; empowered dev teams with self-service deployment portals and standardized templates.
- **Disaster Recovery & Resilience:** Led DR drills and failover testing using automated scripts; ensured RTO/RPO compliance through replicated environments and automated recovery workflows.

Project: SLAB (Inhouse BNP)

Role – Application Analyst

Work Duration: Jun 2015 – Dec 2017

Responsibilities:

- Deploying release in staging and production environment.
- In release changing the setting of front-end server and URL sites, taking back up.
- On demand updating the DB tables, Retrieving & Updating the Customer Details from Database by developing SQL Queries.
- Monitoring 24*7 batch and job in dollar universe and Server monitor, fixing the aborted job.
- Handling, restarting different server like IIS server, Window, Apache & Tomcat server.
- Identify and respond to incidents (Service Now) and issue, by executing SQL/Oracle queries, Linux command and UNIX shell script.
- Monitoring of servers (Solaris) with respect to disk utilization, memory utilization and system logs, Space of server of internal Application, CPU Utilization of each server.
- Handling the business-related issue, handling the bridge calls from audio and video calling and delivering the report to BA of US and Paris.
- Also participating in EOM (end of month). In EOM, executing SQL jobs which extract data for entire month from all DB Tables generate report and verify.
- Following the process of ITIL for Incident, Problem, Release Management

Project: Bolivar (Internship Project)

Job Profile: Intern

Work Duration: Jan 2015 – Jun 2015

Company: BNP Paribas India Solutions Private Limited, Malad East, Mumbai.

Project Description:

Main aim is to automate the generation of the delivery package which includes the jars and properties files. It allows release manager to automatically generate the delivery packages where it is required. It also facilitates the batches to run on the scheduled time by creating session, uproc and batches.

My Role and responsibilities:

- Development and maintenance of project
- Fixing in generating package for UAT
- Identification of bug and the workaround
- Understanding & analysis of user requirement for minor enhancements in JAVA.

Awards and Achievements

- Secured **1st position** in **Carrom** competition organized by Nirmala Memorial Foundation College of Science & Commerce in **2006**.
- Secured **1st position** in Bizz-O-ciate(E-Cell Activity) organized by Thakur Institute of Management Studies Career Development And Research (TIMSCDR) in **2012**
- Successful Migration of SFTP internal application PB Cobra to PB Tiger in BNP, **2018**.

Academics

- ② **Master in Computer Application**, University of Mumbai. Year 2015 with 66.58%.
- ② **Bachelor of Science in Information Technology**, University of Mumbai. Year 2011 with 61.06%.
- ② **Higher Secondary Certificate** exam (12th) from Maharashtra State Board of Secondary Education.

Year 2008 with 64.33%.

② **Senior Secondary Certificate** exam (10th) from Maharashtra State Board of secondary Education.

Year 2006 with 73.06%.

Personal Details

Date of birth	: 19th June, 1991
Blood Group	: B +ve
Place of birth	: Azamgarh (U.P.)
Gender	: Male
Language	: English, Hindi, Marathi
Marital status	: Single

Declaration

I hereby declare that all the details furnished above are true to the best of my knowledge.
